

Auxiliary Materials
Thinners and other Auxiliary Materials for Precious Metal Preparations

Name	Evaporation-No. relative to Diethyl-Ether = 1	Notes
V 16	6	thinner for liquid lustres, suitable for spraying
V 18	40	thinner for liquid lustres
V 23	10	thinner for liquid lustres and liquid precious metal preparations, contains methylene chloride
V 34	200	screen cleaner for precious metal pastes and lustre pastes
V 35	5	thinner for liquid precious metal preparations, quick-drying, contains methylene chloride
V 39	20	thinner for liquid precious metal preparations, contains methylene chloride
V 167	100	thinner for burnish gold pastes, quick-drying
V 170	400	thinner for bright precious metal pastes and lustre pastes
V 170/1	400	thinner for bright precious metal pastes and lustre pastes, slow-drying
V 173	> 2000	thinner for UV-curing precious metal pastes and lustre pastes
V 180	> 150	thinner for silk matt precious metal preparations

Auxiliary Materials
Thinners and other Auxiliary Materials for Colours

Name	Evaporation-No. relative to Diethyl-Ether = 1	Notes
V 191	400	thinner for screen printing media
V 102	400	thinner for screen printing media, slow-drying
V 167	100	thinner for screen printing media, quick-drying
V 110	> 1000	colour resist oil to displace surplus colour
V 193	320	screen cleaner for screen printing colours
V 201	2,8	universal cleaner for organic colours of series OGG 91 and OGG 92/UV

Auxiliary Materials
Thinners and other Auxiliary Materials for Covercoats

Name	Evaporation-No. relative to Diethyl-Ether = 1	Notes
V 17	135	thinner for covercoats, slow-drying
V 200	42	thinner for protective covercoat L 03/04
V 58	33	thinner for screen printing covercoats, quick-drying
V 41	40	thinner for screen printing covercoats
ZE 192	> 40	defoaming agent for covercoats
